## BRAKE PADS:

Mika Metals brake pads are made from an advanced sintered metal technology which generates more stopping power in wet and dry conditions. They are designed specifically for MX and off-road racing and have a progressive feel with no brake fade. Their premium high performance provides a faster way to stop.

# GRIP

## Mika Grips

Built from an advanced medium rubber compound, the grips are specifically designed to increase finger traction while minimizing palm blisters.

18.99\$

### DT1 GRIPS DONUTS

DT-1 grip donuts are dual layered with foam and neoprene. Reduces blisters and creates soft surface between grip and hand.

4.69\$

Constructed from the highest quality aerospace aluminum T6 7075 for maximum strength, the pro series handlebar is also engineered to "flex" for reduced arm fatigue. Mika handlebars contain multiple applications for personalized fit, and are also available in 7/8 and 1 1/8.

# HANDLEBAR

Hybrid Series handlebars are truly a marvel of engineering. It is the first oversize handlebar in the world that fits on 7/8" clamps. The patent pending design is the most unique idea to shake up the handlebar industry in quite some time. They retain all the flex properties of the pro series handlebars and allow you to run oversize bars without the oversize clamps. \*\*BARS ONLY FIT 7/8 DIAMETER CLAMPS\*\*

The RAW series handlebars are designed for maximum comfort. Our unique tapering allows the bars to have increased strength while having the optimal amount of flex to reduce arm fatigue. They are constructed of T6 7075 aluminum, making them as strong or stronger than any non-cross bar handlebar on the market.

# FRONT SPROCKETS

Mika sprockets are made of the highest quality steel to withstand the rigors of off- road racing. They are light, contain self cleaning grooves to improve sprocket life, and have a tooth design which allows for increased power transfer.

# APICA THROTTLE SLEEVE ALLOY INC BEARING

In-built bearing and anti-friction sleeve offer an unrivalled feel and super-smooth action to the twist grip. Sealed bearing at the outer end of the tube reduces friction. Anti-friction sleeve at the cable end. Dirt cannot get in between the tube and bar. Makes cleaning the throttle tube a thing of the past

# FLEXI LEVER

These levers offer the complete solution upgrade from OEM, a lever that looks good, can flex forwards through 110°, and are forged therefore able to bend rather than break in most impact scenarios. The motocross, endure and trials ranges are anodised in manufacturer specific colours with the optional titanium colourway for all applications. There is an Apico laser-etched logo on the front of each lever blade.

Apico have developed their own flexi levers that set them aside from the competition, and offer advantages to keep your lever looking better and performing for longer. We have opted for a higher quality spring, this helps in the event of a crash and stays stronger for longer. There is a notch on top of the lever for the spring to sit into, and a rubber sleeve on the end of the spring that sits in the notch, this prevents scratching to the lever.

The adjuster screw on all Motocross, Enduro and Trials flexi levers allows you to change the reach of the lever to give you a more personal feel to your own set up.

# MASTER CYLINDER PERCH ROTATOR CLAMP

The Apico master cylinder perch clamps are designed to fit on the back of the front brake or clutch master cylinder perch, and come with a black plastic insert. When fitted this will cause them to rotate on impact preventing major damage to the clutch perch or master cylinder. CNC machined from 6061 T6 aluminium and have a universal fitment on most off road bikes. Each rotator clamp is sold individually they DO NOT come in sets.

# FRONT SPROCKET

Raptor front sprockets are a lightweight performance alternative to OEM sprockets. Featuring self-cleaning mud grooves between the teeth for extended chain and sprocket life,

## Technique information

CNC machined from case-hardened Chromoly steel  
Fully heat-treated for maximum strength and durability  
Lightening holes reduce rotational mass  
Self-cleaning mud grooves  
Special coating counters corrosion and provides wear resistance  
Presentable clamshell for an excellent presentation

## FOAM FILTER OIL

FFO is a FOAM FILTER OIL especially formulated to provide outstanding engine protection even in the most severe racing conditions. FFO 's unique formula provides an hyper-tacky oil barrier which traps the smallest dust particles and repels water. FFO improves engine airflow by preventing dust penetration into the air filter.

**FFO has the following characteristics :**

- Hyper tacky formula
- Water repellent
- Improved filter efficiency
- Easy to apply
- Dyed blue to ensure even coverage
